

MATTHEW HO

San Francisco, CA | (510) 396-8553 | mtthwbh@gmail.com | <https://github.com/mattbho/> | <https://mattbho.github.io/>

SKILLS

- Adept communication and leadership skills in team-oriented environments
- Robust experience with web languages including JavaScript, HTML, and CSS
- Skilled in building responsive web applications using modern web frameworks including React, Express, and NodeJS
- Implemented REST API's using NodeJS with the ExpressJS framework
- Integrated data management systems in projects using NoSQL and SQL databases
- Deployed web applications using popular SaaS applications including Netlify and Heroku
- Utilized version control using git and Github for managing large project workflows
- Knowledgeable in modern software engineering practices including SCRUM and Agile development

EDUCATION

San Francisco State University – San Francisco, California

Bachelor of Science, Computer Science

Aug 2014 – Dec 2018

Udemy Web Development Courses

Mastering React and Redux by David Katz

Web Developer Bootcamp by Colt Steele

PROJECTS

Gator Exchange (<https://github.com/mattbho/Gator-Exchange>)

Full stack buy and sell website designed for SFSU students built using modern software engineering practices. Built with a team of seven using the MERN stack and deployed on Heroku/Netlify.

REST Blog App (<https://github.com/mattbho/PersonalBlog>)

A simple headless REST blog application built on NodeJs. Allows users to create their own blog entries and search through numerous blog posts.

Personal Portfolio (<https://mattbho.github.io/>)

A personal portfolio that showcases all current projects. Built using Bootstrap 4. Deployed under GitHub Pages.

DrinksOnMe (<https://github.com/mattbho/DrinksOnMe>)

A React web application which utilizes Javascript's built-in Async/Await functions to call the FourSquare API to display information on nearby bars/restaurants based on the user's location.

WORK EXPERIENCE

Darwin Café – Front-End Engineer

Aug 2017-Present

Maintained front-end of the Darwin Cafe website, updating HTML elements and CSS styles to reflect the Cafe's rotating menu and deals.
