MATTHEW HO

San Francisco, CA| (510) 396-8553 | mtthwbh@gmail.com | https://github.com/mattbho/ |
https://mattbho.github.io/

SKILLS

➢ Strong ability to work in a team environment with great leadership and communication skills
➢ Robust knowledge of HTML5, CSS3, and ES6 JavaScript
➢ Skilled in building responsive web applications using MVC design patterns
➢ Utilized modern libraries and frameworks such as React, and Bootstrap to create single page web applications
➢ Implemented RESTful API's using NodeJS with the ExpressJS framework
➢ Employed the use of SQL and NoSQL databases such as MySQL and MongoDB to achieve data persistence
➢ Ability to work with cloud services including Heroku and Netlify to deploy web applications
➢ Experienced in using git and Github for version control
➢ Knowledgeable in modern software engineering practices including SCRUM and Agile development

EDUCATION

San Francisco State University – San Francisco, California
BS, Computer Science   Aug 2014 – Dec 2018

Udemy Web Development Courses
Mastering React and Redux by David Katz
Web Developer Bootcamp by Colt Steele

PROJECTS

Gator Exchange
Full stack buy and sell website designed for SFSU students built using modern software engineering practices. Built with a team of seven using the MERN stack and deployed on Heroku/Netlify.

Yelp Camp
NodeJS web application which provides users information on numerous campsites while allowing them to create an account to search, create, and update new campgrounds.

RESTful Blog App
A simple REST blog application built on NodeJs. Allows users to create their own blog entries and search through numerous blog posts.

Personal Portfolio
A responsive personal portfolio that showcases all current projects. Built using Bootstrap 4. Deployed under GitHub Pages.

WORK EXPERIENCE

Darwin Café - Barista   Aug 2017-Present
Acquired strong interpersonal skills through interactions with guests as well as strong organizational and problem solving skills through working with the café team.
